

VECTOMEGA®

More of What You Want From an Omega-3 Product

✔ Pure ✔ Clean ✔ Convenient

Less of What You Don't
(oil, rancidity, heavy metals)

Support For:

- Cardiovascular Health
- Brain Function
- Cellular Health
- Anti-Aging*

The Best Choice for Omega-3s

Vectomega® is the first major advancement in Omega-3 science in over 40 years. Unlike most Omega-3 products on the market, Vectomega is NOT a fish oil, yet delivers the ultimate Omega-3 benefits for heart, brain, skin, immune, vision, and nervous system health.*

What does this mean? Vectomega provides **more of what you want**—healthy Omega-3 fatty acids—and **less of what you don't**—oil and calories. Vectomega is available in tablet or capsule form, which means there's no risk of rancidity like there is with fish and krill oil.

10 REASONS VECTOMEGA SHOULD BE YOUR OMEGA-3!

- | | |
|--------------------------------------|---|
| 1 CONVENIENT | Just one daily! |
| 2 MORE THAN KRILL OR FISH OIL | Vectomega provides health promoting phospholipids and peptides in addition to Omega-3s. |
| 3 FRESH | The North Atlantic Salmon used in Vectomega is cold processed RIGHT AFTER the catch. |
| 4 NO FISH BURPS | Vectomega isn't an oil and has astounding stability. This means no fish burps or after-taste. |
| 5 OPTIMUM RATIO | The 2:1 ratio of DHA and EPA in Vectomega is perfect for brain, heart, and eye health, and is never chemically altered.* |
| 6 BETTER ABSORPTION | The Omega-3s are bound to phospholipids, which help Omega-3s absorb better than the triglycerides in all fish oils. |
| 7 NO HARSH SOLVENTS | Unlike fish or krill oils, Vectomega doesn't rely on solvents. That means chemicals like hexane are not used in its production. |
| 8 AMAZING SAFETY AND PURITY | Vectomega is third-party tested for heavy metals, so you're getting a clean source of Omega-3s. |
| 9 RESPONSIBLY MANAGED | The entire fish is used—the head is used to make Vectomega and the remainder of the fish is used for food. |
| 10 A PERFECT MATCH | Unlike Omega-3 oils, Vectomega delivers DHA and EPA in the perfect, bioidentical form your body uses best. |

VECTOMEGA®—A Cleaner Way to Get Your Omega-3

Vectorization—the patented process that makes Vectomega so unique—and has revolutionized the way Omega-3s can be delivered in the body.

- ✔ Provides unique peptides not found in fish, krill, or flax oil.
- ✔ Features phospholipid-bound EPA and DHA that are bioidentical to the Omega-3 forms found in fish—and in humans!
- ✔ Keeps the Omega-3s stable—no worries about rancidity and no fish burps.
- ✔ Uses no excessive heat, chemicals, or solvents.

✔ The Power of Peptides

Vectomega contains an array of bioactive peptides not found in fish, flax, or krill oil. These peptides, formed from amino acids and activated during the digestive process, are unique to Vectomega. They are important because they:

- Support mental well-being
- Help relieve occasional anxiety
- Fight oxidative stress, particularly in the brain
- Support a strong heart, blood vessels and arteries*

Vectomega's fresh-to-you process means it provides peptides. Fish, krill, and flax oil can't.

✔ Beneficial Phospholipids

Vectomega contains **five** types of phospholipids—healthy compounds which are used in the body to form cell membranes. In Vectomega, DHA and EPA are bound to phospholipids. These phospholipids enhance absorption and provide additional health benefits.

✔ Proven Freshness

Vectomega is processed within one hour of the catch using cold water and enzymes. Five leading fish and krill oil products, plus Vectomega, were tested for freshness against the stringent International Fish Oil Standards. **Vectomega was clearly the best, with zero TOTOX value!** No oil can compete with Vectomega for stability and freshness.

✔ No Worries about Heavy Metals

Many fish oils are processed from the fat or liver of the fish, which are notorious for being exactly the place where toxins are stored. Vectomega is third-party tested using ICP-MS method for heavy metals, so you know you are getting a clean source of Omega-3s.

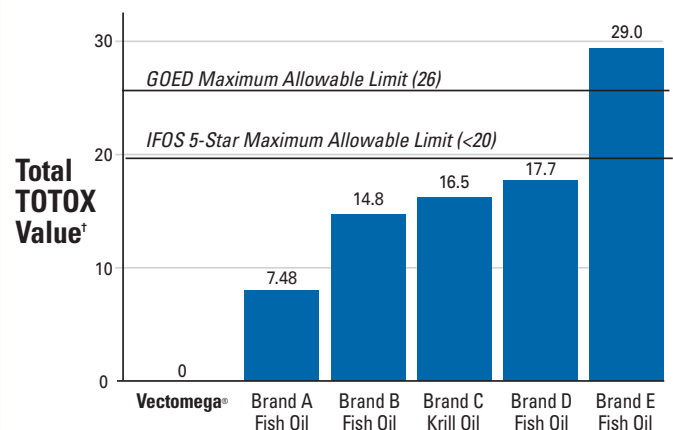

Low TOTOX Value = Fresher Product
High TOTOX Value = Rancidity

Phospholipids in Vectomega®

Type of Phospholipid	Benefit
Phosphatidylcholine (PC)	Growth and regeneration. Assists in the introduction of DHA into the heart muscle. Protects mitochondria from oxidative damage, decreasing the impact of auditory and visual aging.*
Phosphatidylethanolamine (PE)	Combined with PC, helps in the building of the myelin sheath and the astrocyte development of synapses. It is strongly concentrated around the medullar motoneurons.*
Phosphatidylserine (PS)	The most widespread of all membrane PLs, provides broad spectrum brain support.*
Phosphatidylinositol (PI)	Has a major role as a precursor of intracellular signal molecules. Acts on the regulation of cellular calcium. Has a positive impact on mood, brain and heart health.*
Sphingomyelin (Sph)	Found in cell membranes, particularly in the myelin sheath. Closely tied to cholesterol synthesis; supports healthy cholesterol levels already within normal range.*

Measure the Freshness

Levels of Rancidity

FRESHER THAN FISH OIL

Vectomega® is processed immediately after the catch. The fresh salmon source is never exposed to extreme heat or chemicals. Only cold water and enzymes are used to gently extract the Omega-3s in Vectomega.

One Healthy Fish Source

Unlike many Omega-3 supplements, Vectomega uses only one species of fish—Atlantic salmon. Native to the cold water of the North Atlantic, the salmon are harvested in ocean fjords in Norway and Scotland.

Vectomega® vs Fish Oils

ATTRIBUTES	VECTOMEGA®	FISH OILS
Causes Gastric Regurgitation (i.e., fish burps)	No	Often
Single Fish Source	Yes	Varies
Phospholipid Transport	Yes	No
Enzyme and Cold Water Extraction	Yes	No
Highly Concentrated, Single Tablet, Full Daily Dose	Yes	No
Completely Bioidentical to EFA Structure in Salmon	Yes	No
Free of Dangerous Levels of Toxins or Heavy Metals	Yes	Varies
Includes Inflammation Causing Arachadonic Acid	No	Varies
Proven Stability	Yes	Varies
Artificially Added "Spiked" Levels of Essential Fatty Acids (EFA)	No	Often
Increases Free Radicals/Oxidative Stress	No	Yes
Increases Blood Sugar	No	Varies

Convenient—Just 1 Daily!

When it comes to fish oil, the biggest complaints include: large dosage, bad aftertaste, fish burps, and large capsule size. Vectomega avoids all of these! Because the essential Omega-3 fatty acids are bound to phospholipids, they are more stable and better protected from oxidation. This is why there is no burping or stomach discomfort with Vectomega.

Combine Vectomega with these additional Terry Naturally® products for optimum health!
