GENACOL® GOLD+ **BENEFITS FOR** **YOUR JOINT HEALTH**

Genacol® Gold+ Benefits for Joint Health

Genacol® Gold+ joint care supplement combines a high concentration of Turmeric Curcumin with BioPerine® and ultra-hydrolyzed AminoLock® Collagen. Each active ingredient plays a key role in the well-being of your joints.

Turmeric is traditionally used in herbal medicine for joint health and discomfort, thanks to its well-renowned antioxidant properties. Standardized to 95% curcuminoids in Genacol® Gold+, it offers the highest potency available!

BioPerine® is a patented black pepper extract that must be combined with turmeric to enhance its absorption by the body. Our BioPerine® increases curcumin absorption for maximum benefits.

AminoLock® Collagen helps reduce joint discomfort and maintain healthy cartilage. Collagen is an essential component of our body that contributes to the elasticity of tendons, ligaments, and cartilage, supporting joint health. Genacol®'s exclusive AminoLock® Collagen has a low molecular weight, ensuring better absorption by the body.

An Exclusive Patented Technology

AminoLock® Collagen is a unique ultra-hydrolyzed collagen made using our patented AminoLock® Sequence Technology. This process yields peptides with the smallest molecular weight (less than 1 kDa) among all bovine collagen products available on the market. This characteristic ensures that AminoLock® Collagen is easily absorbed by the body for better results.

Scientifically Proven Effectiveness

To date, three independent clinical studies demonstrate the effectiveness of AminoLock® Collagen in relieving joint discomfort and stiffness thanks to its unique combination of peptides known for their benefits on joint health.
